## CONTENTS

Preface ..... 1

Explanatory notes on the tables ..... 2

Table I. Daily and monthly totals of global radiation (J $cm^{-2}$)

Monthly totals of sunshine duration (hour) ..... 7

Table II. Daily and monthly totals of diffuse radiation (J $cm^{-2}$) ..... 39

Table III. Daily and monthly totals of radiation balance (J $cm^{-2}$) ..... 50

Table IV. Monthly means of hourly totals of global radiation (J $cm^{-2}$) ..... 52

Table V. Monthly means of hourly totals of diffuse radiation (J $cm^{-2}$) ..... 59

Table VI. Monthly means of hourly totals of radiation balance (J $cm^{-2}$) ..... 63

Table VII. Monthly totals of sunshine duration (hour) ..... 64

List of stations ..... 65

## СОДЕРЖАНИЕ

Предисловие ..... 1

Пояснения к таблицам ..... 3

Таблица I. Суточные и месячные суммы суммарной радиации (Дж • $см^{-2}$)

Месячные суммы продолжительности солнечного сияния (час) ..... 7

Таблица II. Суточные и месячные суммы рассеянной радиации (Дж • $см^{-2}$) ..... 39

Таблица III. Суточные и месячные суммы радиационного баланса (Дж • $см^{-2}$) ..... 50

Таблица IV. Средние за месяц часовые суммы суммарной радиации (Дж • $см^{-2}$) ..... 52

Таблица V. Средние за месяц часовые суммы рассеянной радиации (Дж • $см^{-2}$) ..... 59

Таблица VI. Средние за месяц часовые суммы радиационного баланса (Дж • $см^{-2}$)..... 63

Таблица VII. Месячные суммы продолжительности солнечного сияния (час) ..... 64

Список станций ..... 65

## PREFACE

The World Radiation Data Centre - WRDC (St.Petersburg, Russian Federation), sponsored by the WMO (Resolution 12, XIV Session of the EC and Resolution 6, XXXVI Session of the EC ), issues this publication with the purpose of providing the users with data on solar radiation, radiation balance and sunshine duration in a convenient and readily accessible form.

From 1964 up to 1992 the radiation data were published once a month. Since 1993 the publication has been issued four times a year.

Observational data received by the WRDC with certain delay are published in the supplementary issues.

The issues are distributed among the National Meteorological Services which send their solar radiation data to the WRDC to be archived and published.

Results of observations at radiometric stations should be sent to:

*The Director*
*Voeikov Main Geophysical Observatory*
*World Radiation Data Centre*
*7, Karbyshev Street,*
*194021, St.Petersburg,*
*Russian Federation*

For inquiries and comments please call:

*tel.: 7 (812) 297-43-90*
*fax : 7 (812) 297-86-61*
*E-mail: wrdc@main.mgo.rssi.ru*

The WRDC's Web-site is *http://wrdc.mgo.rssi.ru*

## ПРЕДИСЛОВИЕ

Настоящее издание осуществляется Мировым центром радиационных данных (МЦРД, Санкт-Петербург, Российская Федерация) по поручению ВМО / Резолюция 12 (ИК - XIV) и Резолюция 6 (ИС - XXXVI) / с целью представления результатов наблюдений мировой наземной сети за солнечной радиацией, радиационным балансом земной поверхности и продолжительностью солнечного сияния в удобной и доступной для потребителей форме.

С 1964 г. публикации осуществлялись ежемесячно. В 1993 г. была изменена периодичность издания - сборники с радиационными данными стали издаваться четыре раза в год.

Материалы наблюдений, поступившие в МЦРД несвоевременно, публикуются в дополнительных выпусках.

Издания рассылаются национальным метеорологическим службам, представляющим в МЦРД для архивации и публикации материалы радиационных наблюдений.

Результаты наблюдений радиометрических станций следует высылать по адресу:

*Директор Главной геофизической*
*обсерватории им.А.И.Воейкова,*
*МЦРД,*
*Карбышева 7,*
*194021, Санкт-Петербург,*
*Российская Федерация*

Для контактов:

## EXPLANATORY NOTES ON THE TABLES

In 1981 the World radiometric network changed over to the use of a new pyrheliometric scale - the World Radiometric Reference (WRR).

Data on solar radiation and radiation balance are expressed in J $cm^{-2}$, data on sunshine duration are given in hours.

Observational data in each table of the publication are arranged according to the Regions adopted by the WMO, countries within Regions are listed in the order of English alphabet, stations of each country are placed by their coordinates from north to south and, if their latitudes are equal, from west to east.

Hourly intervals are given in **True Solar Time (TST).**

For convenience each issue is provided with a list of stations with their synoptic WMO index (if available), full name, latitude, longitude and elevation above sea level, as well as types (symbols) of the instruments which were used for measurements.

### Procedure to Calculate Daily and Monthly Totals

1. A daily total of radiation balance is determined in case the data for all hour intervals of the 24-hour period are available.
   If at least one hourly total value is missing, the daily total is not calculated and the sign of missing data "-" is entered in the table instead.

2. Daily totals of global and diffuse radiation are determined in case the data for all hour intervals of the daytime are available, with the exception of sunrise and sunset hour intervals.
   To avoid unduly great losses of daily totals due to the gaps in the data for sunrise and sunset hours, the following procedure of data processing is accepted.
   In case observational data are missing for the above-mentioned hour intervals on a number of days, we recommend to determine $h_s$ (sun's altitude) for those hours.
   If $h_s > 5°$ , the lack of an hourly total is identified as the lack of observation, and the daily total is not determined for that day.
   If $h_s \leq 5°$ , the daily total is calculated in similar situation.

3. If data for each day of the month are available:
   a) the monthly total is calculated by adding together daily/hourly totals for each day of the month;
   b) the monthly mean of daily/hourly totals is calculated by dividing the monthly total by the number of days in the calendar month.

4. If there are days with missing data, first of all the monthly mean of daily/ hourly totals is calculated and then monthly total is obtained:
   a) the monthly mean of daily/hourly totals is calculated by dividing the sum of daily/hourly totals for the days with available data (including estimated and questionable values) by the number of days with observations;
   b) the monthly total is calculated by multiplying the monthly mean of daily/ hourly totals by the number of days in the calendar month.

5. If there are 10 or more days with missing daily/hourly totals, the monthly total and the monthly mean of daily/ hourly totals are not calculated and "-" is entered in respective columns.

6. If there are from 5 to 9 days with missing daily/hourly totals, the monthly total and the monthly mean of daily/hourly totals are enclosed in brackets.

7. If there are 5 or more daily/hourly totals enclosed in brackets (estimated or questionable), the monthly totals and the monthly mean of daily/hourly totals are enclosed in brackets.

8. If the number of days with missing daily/hourly totals and daily/hourly totals in brackets added together is from 5 to 9, the monthly total and the monthly mean of daily/hourly totals are enclosed in brackets, and if there are 10 or more such days the monthly total and the monthly mean of daily/ hourly totals are not calculated and "- " is entered in respective columns. All radiation parameters and sunshine duration are subject to this rule.

9. The monthly means of daily totals of appropriate radiation parameters from Tables I-III are also given in Tables IV-VI along with monthly means of hourly totals. If all monthly means of hourly totals have calculated, but there are 10 or more days with missing daily totals, the monthly mean of daily totals is calculated by summing up the monthly means of hourly totals for all hour intervals of the 24-hour period for radiation balance and for all hour intervals of the daytime for global and diffuse radiation.

## Notes

1. It should be mentioned that some discrepancies may occur between solar radiation and sunshine duration values measured under the similar conditions of radiation climate because different types of measuring instruments are used by the World solar radiation network.
2. For the stations of Sweden and Japan (Ishigakijima) of the sunshine duration means the time when the direct solar radiation is above the threshold equal to 120 W $m^{-2}$ as measured by the Kipp and Zonen CSD and the Kipp and Zonen CH1.

## ПОЯСНЕНИЯ К ТАБЛИЦАМ

С 1981г. мировая актинометрическая сеть перешла на использование новой пиргелиометрической шкалы- Мирового радиометрического эталона (МРЭ).

Данные по солнечной радиации и радиационному балансу приводятся в Дж·$см^{-2}$, по продолжительности солнечного сияния - в часах.

Материалы в каждой таблице сборника расположены по регионам ВМО, внутри регионов - по странам в порядке английского алфавита, в каждой стране - по станциям в соответствии с их координатами в направлении с севера на юг, при равенстве широт - с запада на восток.

Часовые интервалы указаны по истинному солнечному времени.

Для удобства пользования материалами в каждом сборнике приводится список станций, в котором указываются синоптический индекс ВМО (если он имеется), полное название, широта, долгота и высота станций, а также условными обозначениями типы измерительных приборов, с помощью которых были произведены наблюдения.

### Методика расчета суточных и месячных сумм

1. Суточная сумма радиационного баланса определяется при наличии данных за все часовые интервалы суток.
   Если отсутствует хотя бы одна часовая сумма, то суточная сумма не определяется и вместо нее в таблицах проставляется признак отсутствия данных "-".
2. Суточные суммы суммарной и рассеянной солнечной радиации определяются при наличии данных за все часовые интервалы светового дня.
   Исключение составляют часовые интервалы восхода и захода солнца.
   Для того, чтобы избежать неоправданно больших потерь суточных сумм из-за отсутствия данных в указанных интервалах, принята следующая методика обработки.
   При отсутствии в отдельные дни в указанных интервалах результатов наблюдений рекомендуется для этих часовых интервалов определять высоту солнца.
   Если высота солнца $> 5°$, то отсутствие часовой суммы идентифицируется как отсутствие наблюдения и суточная сумма за этот день не определяется.
   Если высота солнца $\leq 5°$, то в аналогичной ситуации суточная сумма вычисляется.
3. При наличии данных за все дни месяца:
   а) месячная сумма определяется путем суммирования суточных (часовых) сумм за все дни месяца;
   б) средняя за месяц суточная (часовая) сумма определяется делением месячной суммы на число дней в календарном месяце.
4. При наличии пропусков в данных сначала определяется средняя за месяц суточная (часовая) сумма, затем - месячная сумма:
   а) средняя за месяц суточная (часовая) сумма получается в результате деления суммы суточных (часовых) значений за дни с наличием данных (включая восстановленные и сомнительные значения) на число дней с наблюдениями;
   б) сумма за месяц определяется путем умножения средней за месяц суточной (часовой) суммы на число дней в календарном месяце.
5. При отсутствии суточных (часовых) сумм за 10 дней и более сумма за месяц и соответственно средняя за месяц суточная (часовая) сумма не вычисляются и в соответствующих графах таблицы проставляется "-".
6. При отсутствии суточных (часовых) сумм за 5-9 дней сумма за месяц и средняя за месяц суточная (часовая) сумма заключаются в скобки.
7. При наличии за месяц 5 и более суточных (часовых) сумм, заключенных в скобки ( восстановленных или сомнительных), сумма за месяц и средняя за месяц суточная (часовая) сумма помещаются в скобки.

8. Если число дней с пропусками суточных (часовых) сумм и суточными (часовыми) суммами, заключенными в скобки, в совокупности составляет от 5 до 9 дней, то сумма за месяц и средняя за месяц суточная (часовая) сумма помещаются в скобки, а если составляет 10 дней и более, то сумма за месяц и средняя за месяц суточная (часовая) сумма не определяются и в соответствующих графах таблиц проставляется "-". Этому правилу должны подчиняться все радиационные параметры и продолжительность солнечного сияния.
9. В таблицах IV-VI наряду со средними за месяц часовыми суммами приводятся также средние за месяц суточные суммы соответствующих радиационных параметров из таблиц I-III. Если вычислены все средние за месяц часовые суммы, но при этом отсутствуют более 9 суточных сумм, то средняя за месяц суточная сумма определяется путем суммирования средних за месяц часовых сумм за все часовые интервалы суток для радиационного баланса и за все часовые интервалы светового дня для суммарной и рассеянной радиации.

## Примечания

1. Вследствие использования на мировой актинометрической сети различных типов измерительных приборов возможны некоторые несоответствия между значениями солнечной радиации и продолжительности солнечного сияния для пунктов, расположенных в сходных условиях радиационного климата.
2. На станциях Швеции и на станции Исигакидзима в Японии продолжительность солнечного сияния определяется по результатам измерения прямой солнечной радиации (Kipp Zonen CSD и Kipp Zonen CH1) как отрезок времени, в течение которого прямая радиация превышала пороговое значение, равное 120 Вт·м$^{-2}$.
